Anchor's FUNbrellas® are giant, permanent umbrellas constructed from tough aluminum and powder coated steel frames, plus a rainbow of available color and fabric options in acrylic and breathable mesh tops. Originally conceived for use around commercial pools where chemicals, water, and sun are abundant, FUNbrellas® are designed for long life, durability, and ease of use. The single center pole design minimizes obstruction, so people can enjoy the comfort of shade beneath the 12' or 20' diameter umbrella canopies.

HOW IT'S MADE MATTERS

The Skin Cancer Foundation recommends Woven Acrylic Fabrics as an aid in the prevention of sun-induced damage to the skin.
