

SoftSide Safety Pads

Don't Fall for Anything Less

SoftSide Safety Pads are perfect for today's demanding safety fall zone applications. SoftSide is an incredibly durable, 1" to 4" thick, watertight, textured, slip-resistant covered foam padding system designed for water playground and pool use. Our safety pads are custom built to suit your specific needs and may be owner installed.

The Custom Designed Safety Pad You Can Install Yourself!

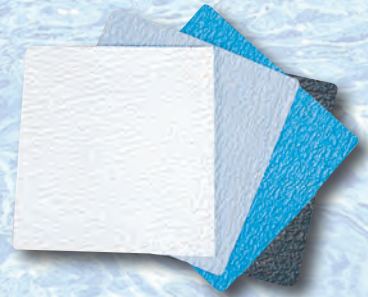

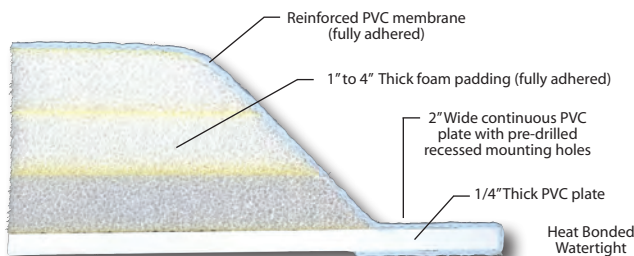

SoftSide Safety Pads

Features:

- **Durable** – Covered with a thick membrane of tough PVC and is warranted for two years.
- **Watertight** – Totally watertight for underwater or outdoor applications.
- **Slip-Resistant** – Surface PVC material is highly slip-resistant, even when wet.
- **Colorfast** – SoftSide maintains its attractive color.
- **Versatile** – SoftSide can be placed in fall zones or wherever extra safety and comfort is desired.
- **UV Stabilized** – Maximum UV inhibitors are incorporated during the manufacturing process.
- **Algae and Fungus Resistant** – Biocides are formulated into the foam and PVC material.
- **Low Maintenance** – SoftSide can be mopped, pressure-washed or sponge-cleaned.
- **Resilient** – Passes all CPSC-ASTM 1292 tests for impact attenuation to drop heights of 12'.
- **Hygienic** – Because SoftSide does not allow liquids or solid matter to pass through, the padding can be maintained in a hygienic manner through topical applications of biocides or through proper pool water chemistry.

CPSC Certified!

Surface Mount Cutaway

SoftSide Safety Pads are available in a variety of different colors and are custom built for owner installation.

Applications:

- **Water Playground Safety Padding**
- **Water Slide Pads**
- **Under Diving Boards or Dive Stands**
- **Wherever comfortable watertight safety padding is required.**
